

GENERAL MANAGERS - OIL & GAS - QUEENSLAND

Our client is a leading Australian provider of specialist project development, management, design, engineering, construction, fabrication and maintenance-related services to the energy, mining and infrastructure sectors, through its three Divisions - Oil & Gas, Mining, and Infrastructure & Services.

Following a period of outstanding business growth, the company is now seeking to appoint 2 dynamic and hands-on leaders as GENERAL MANAGERS within their Oil & Gas Division. Brisbane-based and reporting to the CEO, the mandate is to deliver the next wave of business growth in a burgeoning industry sector.

GENERAL MANAGER - PIPELINE PROJECTS

Reference No. JCB/5180

Right now the timing could not be better to head up the winning and execution of multi-million dollar gas pipeline EPC projects. This GM appointment offers an outstanding opportunity for a senior-level, solidly experienced pipeline project leader to join a national, dynamic and significantly growing contracting company.

The key areas of accountability for this leadership role will include:

- Embedding the company's Mission, Vision, Values, Safety, Environmental and Quality Management policies into the Pipeline Projects teams
- Ensuring the safe, timely and profitable outcomes for all pipeline projects
- Spearheading new business growth and bid/proposal preparation processes
- Nurturing and developing the company's customer relationships
- Leading and developing your team to deliver superior outcomes with high morale and positive internal relationships
- Managing project resourcing requirements, budgets, costs, and project performance
- Managing and mitigating project risk factors

The new GM will have substantial projects and contracts experience in providing long distance and large diameter pipelines in a construction, EPC, and Design-and-Construct environment, in or related to, the petroleum or coal seam gas sectors. Other required traits include an outstanding safety management record, as well as superior communication and interpersonal skills. A recognised degree in civil engineering or a related discipline is required.

GENERAL MANAGER - GASFIELD SERVICES

Reference No. JCB/5181

Take control of an already substantial workload and have the satisfaction of multiplying it significantly. Working in tandem with the GM - Pipeline Projects, the role of GM - Gasfield Services is responsible for the design, construction and servicing of all components of gasfield facilities between well-heads and main pipeline termination points - gas well-head hook up, flowline and compression facilities, transmission and metering, water handling equipment, and all associated turnkey equipment and services. This GM appointment offers an outstanding opportunity for a senior level manager with solid experience in multi-million dollar facilities construction and servicing.

The successful candidate will be responsible for the bottom line management of a substantial business through your team of engineers, technicians, contractors and sub contractors to provide a complete EPC service to your clients. The buck definitely stops with you!

It is essential therefore that you have had previous experience managing O&G operations - in petroleum or coal seam gas sectors - providing multi-million dollar solutions for your exploration and production clients. You should have substantial commercial skills in contract negotiation, quality, OHSE and IR/HR management and a project delivery record that is envied in the industry. A recognised degree in mechanical or electrical engineering, or a related discipline, is required. You will have hands-on experience of remote site logistics of equipment. Your key areas of responsibility are similar to those listed for the GM - Pipeline Projects role, adjacent.

If you are ready for your next career challenge, then please send your up-to-date resume together with cover letter to applicants@aaai.com.au quoting the appropriate Reference No. You are invited to call Jeff Baker on (07) 3831 8500 for additional information and a confidential discussion.
